

Undergraduate Student Researcher Position opening at University of Nevada, Reno

For Summer and Fall 2016

Dept. of Computer Science and Engineering

With Prof. Shamik Sengupta

Website: <http://www.cse.unr.edu/~shamik/>

Send your application to ssengupta@unr.edu with your CV by April 30, 2016

Applications are invited for undergraduate student researcher position to work with Prof. Shamik Sengupta's group in National Science Foundation (NSF) Research project. Undergraduate students interested in any of the topics of Wireless Networking, Communications / Cognitive Radio / Unmanned Autonomous Systems / Cybersecurity are encouraged to apply.

Requirements:

- Excellent programming skills (C/C++)
- Excellent or very good knowledge in Linux operating system and/or commands
- Decent knowledge of Computer Networking or at least some knowledge of Computer Networking

Responsibilities:

- Software development for our radio testbed and testing
- Helping with Operating system build and deploy

Duration

- June 6, 2016 – Dec. 16, 2016 = 28 weeks (though the duration is flexible and can be sorted out based on the student's schedule)

Pay rate is highly competitive.

Research hour per week is flexible and can be sorted out based on the student's schedule.
