

American Nuclear Society

Presents

The Nuclear Navy – 63 Years of Honor, Courage and Commitment

**Thurs. 9/28
6 PM
DMS 105**

**Learn about naval
nuclear propulsion
and how nuclear power
keeps the U.S. safe**

Since 1954, the United States Navy has operated hundreds of nuclear powered vessels in seas and ports throughout the world with an unimpeachable safety record. The U.S. Navy Nuclear Propulsion Program is a unique and extremely rigorous training ground for young people to gain education and experience operating and maintaining these exceptional reactor systems while serving their country. Join the UNR Student Chapter of the American Nuclear Society to learn about the history and future of naval nuclear propulsion as well as career opportunities and the nuclear power training pipeline. Free pizza and drinks provided!
